EXTRAS

Magic: Technomancy

DESCRIPTION

Fizzbin is short and wiry, with mechanical goggles that magnify his eyes and stained coveralls bristling with tools and spare parts. His fingers are often stained with grease, and he has a small mechanical rat drone that scurries at his feet.

PIRATES OF HAVEN

BIOGRAPHY

Fizzbin is a brilliant, if erratic, inventor who grew up tinkering with discarded tech in Haven's scrap yards. His creations are often ingenious, though not always reliable. He makes a living repairing equipment and hacking systems, but he's always chasing the next big idea—or the next explosion.

He is seldom found very far from Annie.

INVENTORY

Rat Drone
